CYCLAMEN 304 - 322

Dear Grower,

Please find enclosed our new catalogue!

We are delighted to present to you the Schneider youngplants 2020-2021 assortment.

In order to select the world's finest-quality varieties we use our many years of experience, our unique global network and several testing areas and of course your feedback of comments to us. The focus is youngplants of annual, biennial and perennial, both from seedlings and cuttings. This year we have an additional larger plug size for the range of Cyclamen as pot plants and we have extended the kitchen garden herbs offer.

The beauty of our industry is that there is always "a next season". We can select the best breeding available and prepare ourselves for the season ahead. Improvements in breeding is actually enhancing to the greatest potential that which nature already provides us with. Any more than this is out of our hands! The very basis of our business, is to grow plants, so let us enjoy our business and remind ourselves that bringing flowers to the world is a good thing to do!

Nowadays, in life it is important to find the right balance between knowing where our roots originate and how we are connected. At Schneider we practise this in a specific way. We connect you with all the major breeders from around the world, and we make sure that the plants you receive are rooted. I wish you a good season.

Best regards,

Jacob Schneider, Director

Push-Up Wooden model 180

Push-Up Plastic model

plug tray 405

plug tray 288

plug tray 112

plug tray 180

Push-Up Tabel model

This new model is suitable for both 405 and 288 trays. This is due to the frame being separate from the interchangeable mechanism.

Push-Up Plates

We have 3 kind of push-up models available for you. The most durable and effective one is the table model, but we offer plastic and wooden models as well.

Schneider youngplants chooses to work with GreenPlug paper pots

Schneider is fully geared up for the future, providing a highly sustainable alternative for you and your customers.

We are pleased to announce that for the 2020 season we will use paper pots for all our cutting propagated young plants. The new tray will have 128 premium quality young plants which are easy for you to transfer and grow. The biodegradable paper is rolled around the soil encasing the plugs. This prevents the soil from coming apart and subsequently the plants smoothly transfer into containers with total success.

The reason to choose Green Plugs

Perfect distribution is vital to achieving the greatest results. To do this, Green Products has acquired an extremely permeable paper and uses proven technology from established industrial leaders. This unique horticultural technique entails an even distribution of crumbly peat particles onto a conveyor belt. The particles are then sprinkled into a channel, forming a natural shape with a diameter varying from 8 to 28 millimeters. This technique doesn't use suction or force, so there is no damage to the soil particles.

Shipment within the Netherlands

For shorter routes within Europe, our young plants are transported on CC-containers.

Within the Netherlands and surroundings Schneider chauffeur, Jan Hooijmeijer delivers your young plants to you with Schneider Trans.

Schneider supplies you worldwide

Schneider is co-operating with the IAA-Fresh company specialised in long distance transportation. Thanks to their know-how and our unique system of trays and logistic solutions, where ever you are in the world Schneider youngplants is able to supply to you fresh and fast.

IAA-Fresh is a dedicated Air Freight Forwarder' with a wealth of experience in transportation of plants, cuttings, in-vitro material, cut flowers and flower bulbs all over the world.

They have a world-wide network, working together with dedicated, local agents and experts in the transport business. Their warehouses and domestic transportation means are fully monitored and temperature controlled.

For long distance transport we stack the trays of young plants in white polystyrene tray-holders, then we place them carefully in cardboard boxes. Depending on the height of the plants, we use two different sizes of tray-holders: low and high.

Carrier	Tray	Per box	Weight	Example item
Low	288/280	7x280	15kg	Begonia semp.
High	112/110	5x110	13kg	Begonia tub.
Low	288/285	7x285	15kg	Cyclamen
High	128/126	5x126	13kg	Petunia Surfinia
High	288/270	5x270	11kg	Tagetes erecta
Low	405/390	7x390	12kg	Viola corn.

Box dimensions for five trays of trailing petunia young plants stacked in "high" polystyrene tray-holders and subsequently placed in cardboard boxes, ready for despatch.

Schneider supplies you worldwide

Cyclamen arriving to Israel in boxes and white styropor carriers

Schneider Transport co-ordinator, Ria checking your young plant shipment before sending, at the warehouse location of IAA-Fresh at Amsterdam Schiphol.

Through the year you can find us participating at:

IPM in Germany, Four Oaks & South West Growers in England, Clydeside TS in Scotland, GLAS in Ireland, Flower Trials, Trade Fair and Hortifair in the Netherlands, Wyss Gartentagen in Switzerland, Crocus in Russia, Indagra in Romania.

IPM

In January we are participating at the IPM in Essen, Germany, which is the world's leading trade fair of horticulture. We will present a selection of our biennials and cyclamen assortment. You are most welcome to visit our stand. For more information and entrance tickets, please ask your sales representative.

Flower Trials

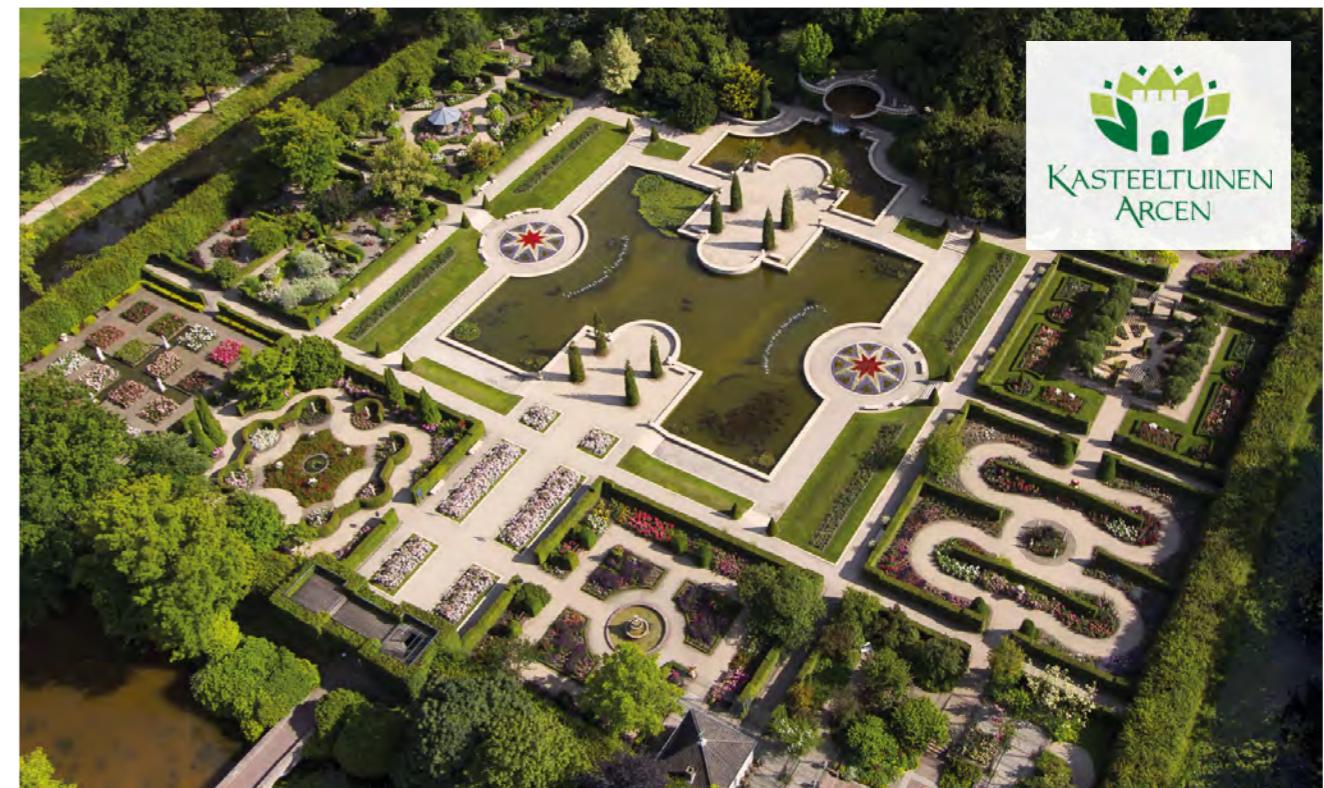

Block week 24 now! We will display the latest assortment in pot and bedding plants to wholesalers, growers and retailers in the Westland area in the Netherlands.

Schneider youngplants and Kasteeltuinen Arcen supporting each other

Schneider is working together with Kasteeltuinen Arcen. On this unique location Schneider is testing the large assortment. It is important to see the garden performance of our plants. So in week 24 you can see at the Flower Trials a nice presentation and a few weeks later you can visit Kasteeltuinen Arcen to see the further developments of the plants. For Schneider customers the entrée to those professional gardens is free of charge.

Please feel free to contact us, so we can make an appointment with Kasteeltuinen Arcen.

Druskininkai, Lithuania

For the 2020-2021 season we have prepared 6 one-species and 10 multi-species Trio's for you. We hope you will find among them the right match for your taste and demand!

Available for you are three individual trays of 112 plugs for each of the 3 varieties forming the Trio. You can plant 3 or more plugs together in pots between 15-30 cm diameter. Enjoy your own mixtures!

Primula acaulis

Primula

Primula Trials in Heidelberg

In Heidelberg (Germany) and Ewijk (The Netherlands) over 400 varieties of Primula and Viola have been tested over the years. The selections made are based on the valuable independent opinion of the Horticultural Research Station Heidelberg as well as an experienced sales team. As a result Schneider youngplants can offer you a wide range of varieties which fit well together both in terms of plant habit and flowering time.

Schneider – Benary co-operation

**Inspire Plus and Inspire Deluxxe
the new innovations from
Schneider Youngplants, for
the professional grower!**

After years of continuous Viola trials using the numerous breeders' varieties, an exclusive range of Viola breeding has led to an additional new range being launched by 'Schneider youngplants' and 'Benary breeding'.

This new brand consists of "Inspire" "Inspire Plus" and "Inspire Deluxxe". It is aimed at the wider European market place and presents XL and XXL flower sizes. Schneider has been successful in determining the most able Viola for performance in the European market.

Tests have demonstrated amazing results of uniformity, rigidity, tolerance to high light and temperature stresses - no degenerative disorders. The results are high impact flower dominance for the retailer and reliable, continuous production throughout for the grower.

CROKINI F1

Let's give way to the new cherry tomato generation!

NEW,
EXCLUSIVELY
FROM
SCHNEIDER!

- A cascade of bunches with many flavorful and sweet fruits.
- Excellent productivity whole season long.
- High resistance to Tomato Mosaic Virus (ToMV), Fusarium (FOL) and Tomato Leaf Mold (Pf), intermediate resistance to Nematodes (Ma, Mi, Mj) and Tomato Yellow Leaf Curl Virus (TYLCV).
- Low sensibility to fruit cracking.
- Can be consumed raw as snack or in salads, but cooked as well.
- Fruit weigh is 15-18 g.
- Starts to fruit 90-100 days after sowing.

66747 Crokini
